

Old Dominion University, Norfolk, USA

AIT has an MOU with Old Dominion University, Norfolk, USA whereby our students do research projects under the guidance of Prof. Ajay Gupta, Director, Computer Science, ODU. Every year a few selected students do their internship at ODU during the summer vacation.

Our students at Summer Research Workshop 2014 at Old Dominion University, USA

This year we have more than 40 students doing their projects under ODU. Hence, we have weekly meetings with ODU, USA and presentations made to ODU, USA. This year 6 students and one faculty member are likely to be selected for Research internship at ODU.

VALUE ADDITION:

Students take up research oriented projects on the latest technologies. The progress of the research activity is closely monitored by the staff at Old Dominion University, USA. Hence, counseling and guidance is provided by them. This results in students having knowledge of world class and cutting edge technologies on Global Standards. Students also get certificates from ODU for having done the project which adds on to their CV as also enhances their career prospects or prospects for pursuing higher education in foreign universities.

Every year we have at least two students who visit ODU, USA and do their internship for a period of 6 weeks. During 2014, we have had 4 students who did their internship. During the internships students work on the latest technologies, get an exposure to international research as also understand the global cultures.

This year 6 students and one faculty member are likely to visit ODU for Research internship during this summer.
