PATENT YOUR PASSION: THE ROLE OF IPR IN ACADEMIC RESEARCH

 25th April 2025 | 11:00 am to 01:00 pm

MBA Auditorium, Acharya Campus

About the Program

Patent your Passion: The Role of IPR in Academic Research* is a specialized workshop/seminar designed to bridge the gap between innovation and intellectual property rights (IPR) within academic settings. It aims to empower researchers, faculty, and students to recognize the value of their creative work and understand the processes involved in protecting it.

Objectives of the Program

- To educate researchers on the fundamentals and significance of IPR.
- To demonstrate how patenting can protect novel ideas and inventions developed in academia.
- To encourage the translation of academic research into practical and marketable solutions.

Expected outcomes of the programme

- Increased awareness and understanding of intellectual property rights among researchers and faculty members.
- Enhanced ability to identify, protect, and manage intellectual property arising from academic research.
- Empowerment of researchers to file patents and transform innovative ideas into protected assets
